

Molding Products LLC, located in South Bend, Indiana, is a manufacturer of custom sheet molding compounds (SMC) serving Tier I automotive, consumer, marine, and industrial thermoset compression molders.

Job Description

The Operator Technician oversees the activities of the Shar machine and supporting processes, such as Pre-weigh, that contribute to the efficient manufacturing of Shar mixes assuring superior quality and on-time products. The Operator Technician reports to the designated Lead, Production Supervisor, or Production Manager.

Authority and Control

The Operator Technician controls all aspects of the Shar machine and has authority to shut down the machine if the quality is at risk of being compromised or is in any way non-conforming.

Job Responsibilities

Responsibilities of the Operator Technician include, but are not limited to, Pre-weighing hand-adds, filling catalyst kettles, re-stocking drums, completing bar coding, cleaning the Shar & Weigh area daily and maintaining 6S standards, performing and entering the SPC data and paperwork where applicable, and interacting with the HMI that governs the Shar processes.

The Operator Technician is directly accountable for the quality, productivity, and timeliness of product(s) mixed on the Shar along with its precursory and post-production processes. Housekeeping and 6S standards are also areas of accountability for the Operator Technician.
