

INTERPLASTIC CORPORATION is the leading manufacturer of unsaturated polyester, vinyl ester and specialty resins, gel coats, colorants and putties under the CoREZYN® and Silmar® brand names for the composites, cast polymer, and solid surface industries. As a pioneer of cutting edge technology, we grow to meet the needs of the composites industry. In addition, all of our manufacturing facilities and research and development laboratories are ISO 9001:2008 and ISO 14001:2004 certified.

We currently have an opening for a **Quality Control Manager** at our **Hawthorne, California** manufacturing facility. This position will manage the activities and personnel in the manufacturing area which relate or contribute to a consistently high – quality product.

Major Responsibilities:

- Follows Company and Site policies and procedures and updates site specific procedures directly related to Quality Control.
- Follows all applicable safe practices. Supports the plant manager in the operation of this manufacturing facility in a manner that promotes employee safety, housekeeping, and compliance with HSE standards. Assumes responsibility so that all direct reports will work safely, minimizing accidents and injuries, and avoid mis-operations.
- Establish and supervise standards for the Quality Control staff which will ensure that products released for shipment to a customer are in specification and in statistical control (where applicable).
- Work with the Production staff - in constructive manner - to resolve and correct production techniques or practices which result in quality problems and/or decreased productivity.
- Interact with the research & development staff, on behalf of the manufacturing group, to ensure that (i) new formulations are within the capabilities of the production staff, and (ii) formulation concerns are quickly resolved by the R & D staff.
- Review batch formulations for accuracy. Initiate and lead productivity efforts that reduce batch adjustment times.
- Site contact for ISO9001:2015 and QMS programs and lead both internal and external audits.
- Oversee SPC and SQC program for the site.
- Participate in the plant's efforts to decrease the level of mixed resins in inventory in the following ways:
- Develop programs to ensure that manufacturing techniques do not allow errors which result in down-grading of good product to odd lot; and
- Participate in the current program to aggressively work off mixed resin in the selected blend resin.
- Ensure that all lab equipment is properly maintained. Work directly with all departments to guarantee that a calibration schedule is maintained for all testing equipment.
- Keep the Plant Manager informed of any obstacles which prevent achievement of the above goals.
- Perform other duties as assigned by management.

Ideal Candidate:

- Experience with a multitude of software programs, including but not limited to: Lotus Notes, Microsoft Office (Project, Powerpoint, Excel, Access, and Word)
- Site specific lab equipment (Viscometers, Thermographs, LabX, ANV, etc.)
- Bachelors in Chemistry or related field or equivalent.
- 3-5 years previous experience in quality control and chemical plant environment or related.
- Excellent verbal and written communication skills.
- Experience leading ISO or QMS programs.
- Must be able to identify and distinguish colors.

Comprehensive Benefits Package:

- Competitive Salary
- Medical Benefit Plan Options

- Dental Plan
- Vision Plan
- Life Insurance Plan
- Short and Long Term Disability Plans
- Medical and Dependent Care Flexible Benefits Plan
- 401K Plan that includes matching as well as profit sharing
